NCH Board Election Statement – Dr Marc Johnson

Having served on the Board of the National Council for Hypnotherapy for approximately six years, including almost two years as Chair, I remain firmly committed to the continued development, strength and professional standing of our organisation.

Throughout my time on the Board, I have sought to bring experience, balanced judgement and a genuine dedication to the interests of our members. My extensive background in psychology, psychotherapy, hypnotherapy and professional education, together with my established reputation within the wider profession, allows me to contribute both practical knowledge and a broader perspective to the work of the NCH.

I firmly believe that the NCH has an important role to play, not only in supporting and representing its members, but also in promoting the highest standards of professional practice, ethical conduct and public confidence in hypnotherapy.

As Chair, I have particularly valued the opportunity to work alongside dedicated colleagues who share these aspirations. I recognise that effective leadership is as much about listening, encouraging collaboration and making considered decisions as it is about providing direction.

Looking ahead, I believe there is considerable opportunity to further strengthen the NCH, enhance the value of membership and ensure that our organisation continues to have a respected and influential voice within the wider therapeutic community and beyond.

I would welcome the opportunity to continue contributing my experience, knowledge and commitment to the NCH, representing our members' interests and helping to guide the organisation through its next chapter.

Dr Marc Johnson
Chair, National Council for Hypnotherapy
